## Colour figures for Chapter 10. Building 79

James Taylor

*Figure 10.1. East-facing (top down) overview of Building 79 showing neighbourhood setting (including adjacent Building 80) (photograph by Jason Quinlan).*

Figure 10.3. Northwest-facing photograph showing the latest occupation surfaces identified in Building 79 (including units 18901, 18902, 18903 and 18904) (photograph by Jason Quinlan).

Figure 10.4. North-facing photograph of the two engaged pillars situated in the northwest corner of the building (F.5019) and in the (probable) centre of the north wall (F.5020) (photograph by Jason Quinlan).

Figure 10.5. North-facing photograph showing detail of plaster on the north wall of Building 79 with red horizontal groove and carbonised post to left (F.5019) (photograph by Jason Quinlan).

Figure 10.6. North-facing photograph detailing the 'pillow-shaped' rounded square 'capitals' (units 18527, right, and 18574, left) that sat atop the engaged pillars of the northern wall, as they were found in situ (photograph by Jason Quinlan).

Figure 10.7. West-facing photograph showing 'wall feature' defined by three distinct pillars, F.5021, set against the internal face of the western wall (photograph by Jason Quinlan).

Figure 10.8. Northwest-facing photograph of western wall of B.79, F.5013. Note the red-painted 'groove' between the two post emplacements. Traces of undecipherable markings were identified on the lower panel and a series of 'stripes' over the upright plaster encasing of the central post emplacement (photograph by Jason Quinlan).

Figure 10.9. Northwest-facing photograph of northwest engaged pillar (F.5019) after the removal of the 'pillow capital' (18574), detailing linear voids in the northern wall of Building 79, thought to have been left by timber structural elements (photograph by Jason Quinlan).

Figure 10.10. West-facing photograph showing northern half of Building 79 including the northern platform, F.5033 (photograph by Jason Quinlan).

Figure 10.11. Mudbrick wall in collapse (18529), possibly associated with a lightweight structure upon the roof (photograph by Dan Eddisford).

Figure 10.12. North-facing photograph showing a concentration of unusually narrow bricks (18539) thought by the excavators to have collapsed in from a lightweight structure upon the roof (photograph by Dan Eddisford).

Figure 10.13. The remains of a plastered architectural feature or installation (18534) within the collapsed debris of Building 79 (photograph by Dan Eddisford).

Figure 10.14. Northeast-facing photograph showing human cranium in room fill (18520) (photograph by Dan Eddisford).
