1. ACKNOWLEDGEMENTS

I wish to thank the Ministry of Culture for granting the necessary permissions.

Above all, to my Ministry representatives I owe a special debt of thanks:

1983 İsmet Ediz
1984 İsmet Ediz
1989 Mehmet Akalkan
1990 Byn Sena Mutlu
1991 Mustafa Akaslan
1993 Yaşar Yılmaz
1994 Byn Nursel Uçkan

As in previous fascicules, Brian Williams drew the maps and Abigail Robinson formatted the text and illustrations. To both my thanks.

I am grateful to Prof. Dr Sencer Şahin for a photocopy of 48. Solak, to Prof. Dr M. Zimmermann for a photograph of 28. Düğer, and to Dr Nicholas Milner for preliminary information on 21. Balbura, Koca Çeşme.

2. BIBLIOGRAPHY

2.1 Abbreviations

The following abbreviations, for journals and serials and for books and series, are not found in the current lists:

AST *Araştırma Sonuçları Toplantısı*

KST *Kazı Sonuçları Toplantısı*

IGRR Cagnat, R. (ed.), *Inscriptiones Graecae ad Res Romanas pertinentes* 1, 3, 4. Roma 1911, 1927 (reprint Roma 1964)

Kiepert Kiepert, R., *Karte von Kleinasien*. Berlin 1902-1906 (revised ed.)

2.2 Bibliography

Note: The abbreviations primarily employed here are listed in *L'Année Philologique*, “Index of Articles”; they are supplemented, where necessary, (1) by *AJA* 90 (1986), 384-394 “Abbreviations (1) for Periodicals and (2) for Individual Works” and *AJA* 104 (2000), 10-24, and (2) by *Zeitschriftenverzeichnis nach Abkürzungen*, *JdI Archäologische Bibliographie*

3. NOTES AND COMMENTS

3.1 Administrative Areas and Codes, and Maps

The province (il or vilayet) and the district (ilçe), together with their official codes, are given at the head of the rubric for each milestone. The third digit (in the group) records the sub-district (bucak) in which the milestone is now located or from which the stone has been removed (e.g. to a museum). The reference which immediately follows the administrative code indicates a named sheet and the grid square on the sheet. These named sheets form a single set of 1:200,000 maps based on a series of Ottoman maps (extremely rare) printed c. 1890 in Ottoman script. Under the Republic all names on the Ottoman maps were transliterated in a Latin font. The latest printing-date of the post-Ottoman maps seems to be c. 1941.

3.2 Dates

The dates, cited here, for the Imperial tribunician power, consulship and (if any) imperial acclamation, are taken from the tables published by Kienast (1996).

3.3 *Caput Viae*

A separate entry, indicating the starting-point (or destination) both of the road and of the measurement given in the distance figure has been inserted, for each milestone, immediately below the given text and above the entry for the date. Because of inherent difficulties, the *caput viae* is listed in hierarchical sequence, according to the degree of probability or possibility, as follows:

Conana	– the <i>caput viae</i> is inscribed in the text,
(Conana)	– the distance-figure is inscribed but the <i>caput viae</i> omitted,
[Conana]	– neither <i>caput viae</i> nor the distance figure have survived.

3.4 Lycia et Pamphylia

3.4.1 Provincial Boundaries

Insofar as it is possible to delineate the province in the year AD 198 (the sixth tribunician power of Septimius Severus), the provincial boundaries have been defined as follows:

On the North

- (1) by natural geographical and physical features, principally high ground and watersheds, and
- (2) by the boundary established for Galatia by the distribution of milestones bearing the name of known governors of Galatia;
- (3) by the boundary known or estimated for the city-territories of Sagalassus and Lysinia, and also
- (4) by the boundaries known or estimated for the city-territories of Adada, Selge, Etenna and Cotenna.

On the West

- (1) by natural geographical and physical features, principally high ground and watersheds, and
- (2) by the boundaries known or estimated for the city-territories of Telmessus (on the high ground S of the Indus river valley [modern Dalaman Çayı]) and Balbura (on the Boncuk Dağları). The boundary between Lycia and Asia in AD 43 is illustrated by Şahin and Adak (2007, Map).

On the East

On epigraphic evidence (two diplomas, the earlier dated to AD 139 [naming Laertes] and the later [naming Sydera] to 145, see Kellner 1997, 321 and Map): Laertes was situated in Pamphylia but Selinus in Cilicia (death of Traianus at Selinus, 7 Aug[?] AD 117). Syedra has here been treated as a city of Pamphylia, on the grounds that the format and wording of the Demirtaş milestone (here no. 49) find parallels on other milestones of Pamphylia, but cp. Kellner (loc.cit.) who sets the Pamphylian-Cilician frontier along a line NW of Syedra, thereby assigning that city to Cilicia. Here the boundary has been located on one of the small rivers SE of Syedra, perhaps the Sedra Çay itself.

3.4.2 Roads on the Conspectus Maps (Figs 5.1-5.2)

As in earlier fascicules I have maintained the principle that the presence of a milestone indicates the existence – though not necessarily the course – of a Roman road. My researches in *Lycia et Pamphylia* were therefore concentrated, as in *Asia*, on the location of published milestones and, where time allowed, to search for any available trace of paved roads to which the milestones could be assigned. In fact this research strategy was overtaken by the discovery of the *Stadiasmus Patarensis* and the subsequent, intensive and thoroughly illuminating exploration of the routes indicated in the *Stadiasmus* text (Şahin and Adak 2007).

The conspectus maps (Figs 5.1-5.2) are not intended to illustrate the road-system over the whole of Roman Lycia nor do they replicate the network of roads documented on the *Stadiasmus* map of Şahin and Adak (2007). Not all the roads of the *Stadiasmus* are repeated here; for a concordance of the *Stadiasmus* roads and the conspectus maps, see below, Note 3.4.4. The maps (Figs 5.1-5.2) represent only –

- (a) those roads to which milestones may be attributed,
- (b) those roads which I have observed,
- (b) those roads which have been observed by others,
- (c) those roads the existence of which may be presumed or conjectured.

In general, for the whole of *Lycia et Pamphylia*, while for some routes there is evidence from observed remains, nevertheless for other routes the existence of a road is largely conjectural, e.g. E.5 [Perge - (Cibyra - Laodicia) road] - (?) - *Via Sebaste*, or C.7 *Via Sebaste* (Baris?) (- Apamia).

Note that the location both of milestones and of roads was noted in the days before GPS.

3.4.3 The *Stadiasmus Patarensis* and Roman Roads in Lycia

Only in *Provincia Lyciae* – that is to say, before the creation (under Vespasianus, ? AD 70 or 71; for recent epigraphic evidence, see Adak and Wilson [2012, 1-40]) of the combined province, *Lycia et Pamphylia* – is there extensive and detailed evidence for road-construction at the beginning of Roman administration, in the years following AD 43 (Claudius' action to make Lycia a Roman province). The essential documentation is to be found in the *Stadiasmus Patarensis* (Şahin and Adak 2007) and in other epigraphic evidence, such as the bridge inscription at Kemerarası below Oenoanda (Milner 1998).

The information on the *Stadiasmus* represents a compilation (ordered by Claudius and supervised by the governor, Quintus Veranius) of roads made and distances measured, both presented – as it were – at a micro-scale: contrast the long-distance routes of Macedonia (R. Gallikos: AE 1976.643, 260 MP from Dyrrachium) and Asia in the Republican period, as, for example, between Pergamum and Side (331 MP: RRMAM 3.1. 10)

But to what end? If the purpose was not simply the physical – military – control of new territory, after the civil disturbances of the previous decade, what stronger purpose might there have been? What was the underlying aim, that is to say, what was the strategy behind the programme of road-building and road-measuring?

Underlying the presentation of the map *Lycia et Pamphylia* (Figs 5.1-2) there is a presumptive hypothesis. I suggest that this enumeration of places and distances does not wholly reveal framework necessary for the administration of the new province, such as the relationship between centre and periphery, the need for rapid communication between major centres and the distinction between localized routes and major arteries. It may be more instructive to question whether or not the document – as a summary of roads and distances – reflects the template of intentions – in a word, administrative policy.

Setting aside the roads of military significance, i.e. those directed at the legionary fortresses, I interpret the Roman road-system in Asia Minor as an organized development which was designed to facilitate provincial administration. For the most part the roads of Roman Asia Minor were founded on pre-existing routes/roads, as, presumably, here in Lycia – hence the use (on milestones) of the phrase *vias stravit/erunt*. For the earliest years of the Republican province of Asia there is sufficient evidence (from milestones) to support this interpretation; see the presentation of Mitchell (1999, 22ff with map, p. 21).

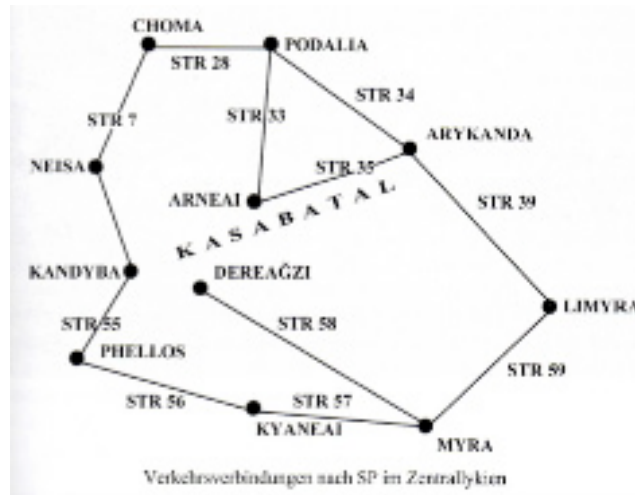

On the basis of literary and epigraphic texts, especially the Ephesus text (Habicht 1975, 64-91) (dated to the Flavian period). Mitchell re-assembled and discussed the evidence (1999, 22-29 with extensive bibliography) for an administrative system based on Assize Districts, *conventus*, διοικήσεις, to which were attached towns and smaller communities such as villages, rural markets, farmsteads. For the dependance of smaller communities on the cities, the *conventus* centres, see Habicht (1975, 67 “cities, tribes, ?demes”). In this context, Mitchell cited texts for the origin and survival of this hierarchical organization in the years after the creation of the province Asia; see Strabo [14.1.38, C 646] for the origin in the years 129-126 BC when M’ Aquilius διέταξε τὴν ἐπαρχίαν ἐς τὸ νῦν ἔτι συμμενον τῆς πολιτείας σχῆμα. A text, *inter alia*, from Didyma [I.Didyma 149] for the survival of the organization. It may be noted that the Didyma text gives a list of the *conventus* cities of Asia: Cyzicus, Adramyttium, Pergamum, Sardis, Ephesus, Miletus, Alabanda, Halicarnassus, Laodicia, Apamia, Synnada, Philomelium; the text is dated to AD 40, three years before the the creation of a *provincia Lyciae*.

I pose the question, therefore: Does the evidence of the *Stadiasmus* support a similar interpretation for the newly created province?

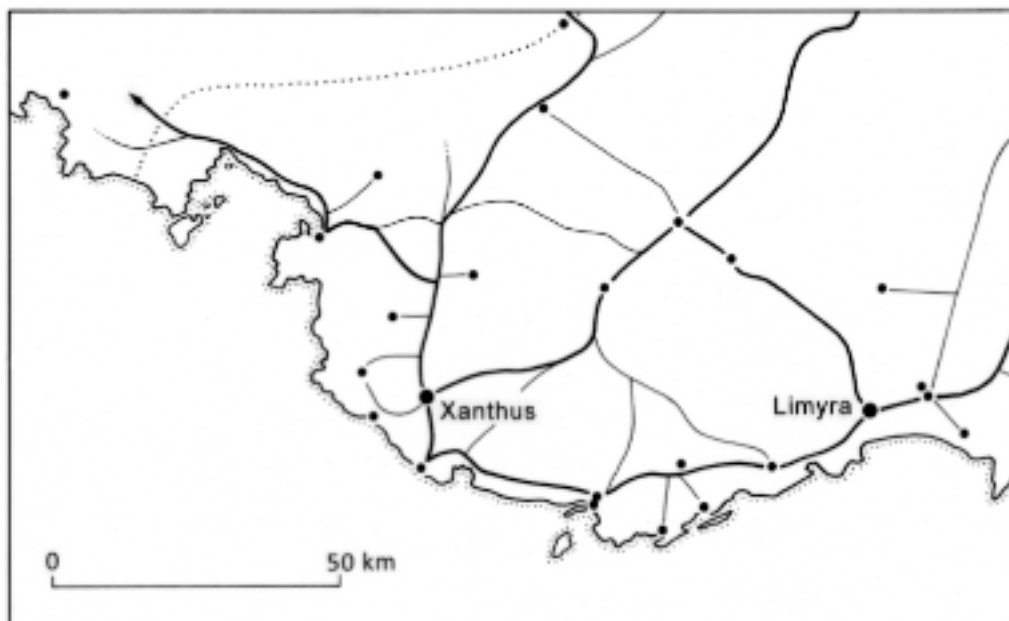

For Lycia Şahin and Adak (2007, 209-211) do, indeed, provide, in a broad overview, an illustration of a hypothetical road-network. I reproduce their diagram in the facsimile below (p. 13).

This overview gives equal weight to all sites, without hierarchy, small centres together with larger centres.

On the road-system of Lycia my own premise may be simply stated: that a provincial road-network was created as the means of administration at several levels, whereby the major centre(s) – “provincial capital(s)” – were linked by major roads (1) to the major centres of other provinces and (2) to major cities within the province, and then by minor roads (3) to minor towns and finally (4) to lesser settlements/sites (sacred sites, villages, farms) associated with, or dependent on, larger towns and cities. This hierarchy of centres requires a network both of major, arterial roads and secondary

roads to which in turn were linked minor, local roads, “feeder roads”, perhaps within a city-territory. Within the pattern I postulate nodal points – Ramsay’s term for a nodal point was a “road-knot” (Ramsay 1890, 50) – which may be likened to the *conventus*-centres of Asia province. These nodal-points together with the major roads, leading to and away from the major centres, I illustrate as follows:

In order further to describe the combination of roads of differing status [numbered (1) to (4) in the preceding paragraph] I offer my interpretation in the form of a botanical image, in which the pattern of roads resembles the veins, symmetrical or not, on a leaf: central or main arteries from (or to) which minor veins spread in the form of branches.

Naturally, this interpretation of the relationship between the cities and towns of the the *Stadiasmus* and the Roman road-network as reconstructed by modern research requires extensive testing from all sources, both epigraphic and archaeological.

NOTE on Photographs and Squeezes

The photographic illustrations in the fascicules of RRMAM are not intended to give more than a visual indication of the location and condition of the milestone: in publishing photographs in this and in all the fascicules of RRMAM I have been attempting to illustrate their state as recorded. My photographs do not, indeed mostly cannot, stand as an ultimate authority on the text. I decided at the outset of my work that when a milestone is extant, accessible and recordable, the primary source for the text would be, if at all possible, a paper squeeze made with one or multiple (overlapping but not bonding) sheets of a standard size; but cf. the method introduced by Walser (1971).

My squeezes are stored in the BIA. Photographs of the collection are available on the BIA website: www.biaatr.org/squeeze/index.php.

4.3 Epigraphic Conventions

MAJUSCULE	Letters read on the stone (or preserved in an earlier copy) but not understood by the editor
[α β γ] [a b c]	Letters, lost through breakage or no longer visible, restored by the editor
{α β γ} {a b c}	Letters cut in antiquity but thought by the editor to be superfluous
⟨α β γ⟩ ⟨a b c⟩	Letters thought by the editor to have been accidentally omitted in antiquity and, therefore, supplied by the editor
(α β γ) (a b c)	Letters supplied by the editor in order to complete or to amplify an ancient abbreviation
⌈α β γ⌋ ⌈a b c⌋	Letters erased in antiquity but still wholly visible
⌊α β γ⌋ ⌊a b c⌋	Letters erased in antiquity and only partly preserved
⌈⌊α β γ⌋⌋ ⌈⌊a b c⌋⌋	Letters erased in antiquity, no longer visible, restored by the editor
α̇ β̇ γ̇ ȧ ḃ ċ	Letters, damaged and/or only partly preserved, the interpretation of which is open to doubt; consult the drawing (where available)
(sic)	Words or letters correctly cut but thought to be grammatically or orthographically remarkable or unusual; where possible, given by the editor as preserved on the stone
α̂ β̂ γ̂ â b̂ ĉ	(A modern error) Letters or words emended from an earlier copy of an inscription which is not now available to the editor; a note is given in the apparatus or in the commentary
/α β γ/ /a b c/	(An ancient error) Letters or words incorrectly cut, or malformed, or for which, in error, different letters or words have been inscribed on the stone; suggested corrections are supplied by the editor; consult the drawing (where available) and the commentary
ᾱ β̄ γ̄ ā b̄ c̄	Letters seen by an earlier copyist but no longer visible or preserved
(vac) or (v)	vacat, i.e. an empty space
[. . 4 . .] [. . . .]	The figure, or the number of dots, within the square brackets indicates the precise number of letters required to fill a known space or to complete the inscription
[- - - -] - - - -	The dashes within the square brackets indicate an indefinite number of letters to be restored in the text in order to fill a known space or to complete the inscription; if the square bracket is not present, the number of missing letters (and hence of missing lines) is not known
ligatures	The presence of ligatured letters is indicated in the commentary
αβ γ abc αβ γ ab c	The vertical line indicates the original line-divisions, whether falling in a single word or between two words, in an inscription which is printed as continuous text or as verse
αβ γ abllc αβ γ ab ll c	The double vertical line indicates the end of every fifth line (the fifth, tenth, fifteenth and so on), whether falling in a single word or between two words, in an inscription printed as continuous text or as verse

4.4 Texts

A. GALATIA

A.1 VIA SEBASTE

01. Kovanlık, Döşeme Boğazı

<i>Province, Sub-Province + Admin. Code</i>	Antalya 07-00-4
<i>Map</i>	Elmalı 40-Iy (20.08)
<i>Location</i>	<i>In situ.</i> Lying on W side of Roman road, at the foot of a ramp which takes the Roman road, in a zig-zag, through a narrow gorge; c. 1 km N of the main area of ruins at the mouth of the valley
<i>Copy</i>	DHF 21.vii.1988, 20.vii.1990 and 21.xi.1991. DHF squeeze in BIAA. No photo.
<i>BIAA Collections, Squeeze and Stone Photographs</i>	
	Squeeze: 07. Antalya 03, Dağ, Döşeme
<i>Description</i>	A simple cylinder, on a plinth. The shaft is straight and roughly smoothed; at the bottom, there is a square plinth. The top is flat. The inscription is cut on a shallow, recessed panel, once smoothed; the inscription begins c. 0.09 m below the top of the panel. The stone is complete. Hard, pale grey limestone. Surface and letters: extremely worn; faint traces of line 1.
<i>Dimensions</i>	Ht (overall) 1.96; (shaft) ht 1.57, (diam.) (top) 0.69; (plinth) ht 0.39, wi. 0.78; (panel) ht 0.59, wi. 0.46. Letters: (line 8) c. 0.09

line 5: “S(?)ES(?)(or C or B)A[.]E(?)M(?)” (Ramsay *apud* CIL 3. 6974). Ramsay had earlier commented (1888, 263 n.80) “[Mommsen 1884b] no. 1367, l. 5, is very hard to read. I examined the stone again in 1886. The last word consists of seven Letters: all more-or-less doubtful, the first is probably S, the second E, the third perhaps S or C or B, the fourth A, the fifth uncertain, the sixth probably E, the seventh probably M.” Berard noted (1892, 420), “Notre lecture et l'estampage nous fournissent les corrections suivantes, 1.5 XIXX VIAMSECARAM(?); 1.6 CVRANTECORNUTO”. I suggest -EN rather than -EM at the end of the line, i.e. SEBASTEN. Clearly Ramsay himself was uncertain (“probably M”). This possible occurrence at Ürkütlü is the sole evidence for -EM, in all other instances where the letter is well preserved the end of the word is -EN.

Caput Viae (Colonia Antiochia)
Date 6 BC, 26.vi-31.xii Augustus

04(B). Ürkütlü 2

Province, Sub-Province + Admin. Code and Map As 04(A)
Location In an old village cemetery (now disused), on the E edge of the present village and on the N side of the road at the entrance into the village
Copy DHF 12.xi.1976. Subsequently (c. 1980), in a manic search for the gold hidden (so the belief) behind the writing, some villager broke and smashed the milestone into a myriad of small fragments. Apart from some small pieces the milestone is now essentially lost. DHF squeeze (drawing, Fig. 6.2.3 [p. 130]) in BIAA. Text here from DHF squeeze

Caput Viae (? Baris)
Date AD 311, beg. May-313, Aug/Sept. Maximinus and Constantinus I and Licinius I *Augusti*, then (the names and titles of Maximinus having been erased)
 AD 313, Aug/Sept-317, 28.ii Constantinus I and Licinnius I *Augusti*
Commentary The text has been restored after 10(A). İlyas 1, above.
 The name of the *caput viae* is not given. Perhaps it can be suggested that the stone marks the first mile from the boundary between Lysinia and Baris or, tentatively but temptingly, the first mile eastwards from Baris, if this city can indeed be located at Ardıçlı Tepe, cp. the commentary below, no. 12 Tepecik.

<i>Caput Viae</i>	(? Baris)

Date (1) (?)
 (2) (?) AD 197/198, 10.xii-09.xii [Severus TRP VI] L. Septimius Severus and M. Aurelius Antoninus (Caracalla) *Augusti* with P. Septimius Geta (names erased) *Caesar*

Commentary The name of the *caput viae* was not given.

From what *caput viae* was the distance-figure established? Was the milestone near to its original position on the *Via Sebaste*?

Before the stone was removed to Senir, the find-spot lay – it was stated by the *reis* – on or near to the Roman road which passes through the valley on the W side of the high ridge named (on the 200,000 map) Senirtepleri, W of Senir. The distance from Keçiborlu – c. 16 km (= 10.5+ MP) to the stated location of the milestone – does not equate (even approximately) with the numeral VIII.

Where, then, was the *caput viae* of the Tepecik milestone? There are four possibilities:

(1) Keçiborlu – if the milestone was removed from the vicinity of its original position to the location whence it was taken by *belediye reisi* to Tepecik, then it is possible to suggest that the *caput viae* of the milestone might be located at Keçiborlu. At Keçiborlu, no ancient remains have been reported. A statue, however, dedicated to Severus Alexander (Waldmann 1981, 101 no. 10 = Bull. 1982. 289) indicates the location of an urban site in the neighbourhood.

(2) The border between the provinces of Asia and Galatia – located in the narrow valley (the “Pisidian Gates”) N of Keçiborlu and hence even further from the stated location (of the Tepecik milestone) than Keçiborlu itself.

(3) İlyas, Ardıçlı Tepe – the ruins (c. 8 km E of İlyas and c. 5 km W of Tepecik) identified by Sterrett (1884-85, 418-419 and inscriptions nos 615-616) and described by Bean (1959, 81) are c. 8-9 km (= c. VI MP) W of the stated location of the Tepecik milestone. Numerous inscriptions have been recorded in the neighbourhood of Ardıçlı Tepe and İlyas both by Sterrett (1884-85, 415-424 nos 612-621) and by Bean (1959, 81 no. 25); one (no. 612) is a decree of ἡ βουλὴ καὶ ὁ δῆμος.

(4) Fa(h)ri şehri – a hüyük in the plain, c. 2 km E of Kılıç village (TIB “Siedlungshügel 2,5 km SW von Kılıç”) [indicated on the 200,000 map: Isparta-Burdur 37-Ir] at some distance from the Roman road. At this site, however, the principal ceramic materials are prehistoric but the TIB team identified late pottery and (?)structures on, and N of, the mound.

On accepted opinion, the location for *Baris* has been sought at Fa(h)ri şehri, see TIB 7 Phrygien, 206, cited by Stephen Mitchell (Barrington Atlas II, 998); further bibliography: Robert (1960, 353 and n.4, and earlier references, 596; also 1962, 283 n.2) and von Aulock (1979, 23-28). It is tempting, however, to locate Baris at Ardıçlı Tepe, cp. the distance-figure, MP I, on the milestone at İlyas, no. 11(A). “At the ruins of the ancient town” Sterrett (1884-85, 415 no. 612) recorded a decree of ἡ βουλὴ καὶ ὁ δῆμος and another (ibid. no. 615) which mentions a ναός, a temple.

Commentary

“The stele also contains, apparently, a Latin inscription cut as a palimpsest on an almost undecipherable Greek one. Traces of twelve lines remain, but few complete words are legible. Of the Greek text, [Τοις επιφανε]στατοις in l. 2, Ουαλ[εριω] in l. 3, and again in l. 4, and ΤΕΡΜΗC[CEΩN] in l. 11, are alone certain; of the Latin, D[D]NN in l. 1, CONSTANTI[NO?] in l. 2, and again in l. 8, and CAESSSS in l. 12. Perhaps originally a Greek version of A., supplanted by a Latin inscription late in the reign of Constantine, on the occasion of repairing the road from Termessos to Isinda. Many mile-stones from Phrygia have been similarly treated” (Woodward 1910/11, 208).

<i>Location</i>	In the Church of St Nicholas. Used as the support for one of the arches and recesses on the N side of the S transept; one end partly buried below the pavement
<i>Copy</i>	DHF 22.vii.1990 and 23.xi.1991; Takmer (date ?). DHF squeeze (drawing, Fig. 6.2.14 [p. 135]) and photos (Pl. 7.1.20-21 [pp. 146-147]) in BIAA. Text here from DHF squeeze
<i>BIAA Collections: Squeeze and Stone Photographs</i>	Squeeze: 07. Antalya 04, Kale Stone: (1) B/W Neg.: DHF M/88/08.10-13 (2) Col. Slide: DHF 353.32-39bis
<i>Publication</i>	Peschlow 1975, 321 and Pl. 111C (the column is visible at the bottom right corner) (photograph only) French 1991b, 9 (notice) French 1991c, 155 (notice only) French 1992b, 202 and Fig. 8 (notice and photo.) TIB 8, 3, photo. Fig. 24 Takmer 2004, 109 AE 2005. 1500 a-c) (text of Takmer 2004) SEG 54. 1412 (text of Takmer 2004) Şahin and Adak 2007, 113 (citation)
<i>Description</i>	Milestone or terminus-stone, in the form of a re-used column. Complete but chipped at shoulder. Hard, pale grey limestone.
<i>Dimensions</i>	Ht (vis.) 1.82; diam. (top) c. 0.47. Letters: (text 1) (line 1) O of TON 0.044, (line 3) O of TON 0.033, (line 6) O of ΠΟΛ 0.027; (text 3) (line 1) O of TOY, (line 2) B of BAC 0.055, (line 5) O of IOC 0.018; (text 4) (line 4) O of OY 0.026, (line 8) T of TOY 0.035
<i>Text</i>	(1) (on the face of the shaft; on the r. of texts [2]-[3]; in the present location of the column, the text is upside down) <div style="text-align: center;"> <p>Τὸν θεϊότατον</p> <p>2 καὶ ἐπιφανέστα-</p> <p>τον Καίσαρα</p> <p>4 Γαλέριον Οὐαλέριον</p> <p>[[Μα[ξιμι]αν]]ὸν Μυρέων</p> <p>6 ἡ μητρόπολις</p> </div> <p>(2) (on the face of the shaft; on the l. of text [1] and, similarly, upside down; in its original position, below text [4])</p> <div style="text-align: center;"> <p>Τ[[[φ]]] θεοφιλεστάτ[[[φ]]]</p> <p>2 Σεβαστ[[[φ]]] Οὐαλεντινι-</p> <p>[[[ανφ] - - -]]</p> </div>

4 [[- - - - -]]
 [[- - - -]]
 6 ἡ μητρόπολις

line 3: c. 12 letters have been erased

line 4: c. 8 letters have been erased

line 6: ΗΜΗΤΡΟΠΟΛΙς survives in line 7 of text (3)

The text may perhaps be restored as follows *vel sim.*:

 Τ[[Ϝ]] θεοφιλεστάτ[[Ϝ]]
 2 Σεβαστ[[Ϝ]] Οὐαλεντινι-
 [[ανϜ τϜ αἰωνίϜ]]
 4 [[᾽ΑυγούστϜ]]
 [[Μυρέων]]
 6 ἡ μητρόπολις

(3) (except for the first two lines, text [2] was completely erased and the remaining lines of the old text [2] were adapted to the new text [3])

 Τοὺς θεοφιλεστάτους
 2 Σεβαστοὺς Οὐαλεντινιανὸν
 καὶ Οὐάλενταν (sic)
 4 καὶ Γρατιανὸν Αὐγγ
 CEΓΟΥΔΩ Κάστος ὁ λαμπρ ἦγε
 6 Μυρέων
 ἡ μητρόπολις

line 1: OYC for the erased ω of text (2) (twice)

line 2: OYC for the erased ω of text (2); ANON added to the end of the line

line 3: KAIOYALENTAN cut over the erasure of text [2] line 3

line 4: KAIPATIANONAYΓΓ added to lines 1-3; KAIPATIAN cut over the erasure of line 4 of text (2) and ONAYΓΓ then added to the end of the line

lines 4-5: two lines (4-5) of text (3) occupy the vertical space of line 4 of text (2)

line 5: CEΓΟΥΔΩ, ? perhaps = the stone-cutter's version of the Greek CEKOYNΔOC, i.e. the latin Secundus, or simply my mis-reading of the squeeze; KACIOC (Takmer); ὁ λαμπρ(ότατος) ἦγε(μῶν)

lines 5-6: seem to have been squeezed into the space between lines 4 and 7; the traces of lettering on the stone are compatible with a second erasure (now underneath lines 5-6), perhaps ΜΥΡΕΩΝ; an M is just visible under CE

line 7: ligature HM; ΜΗΤΡΟΠΟΛΙς survives from line 6 of text [2]; the lettering is similar to that of lines 1 and 2 of text (2)

(4) (at the top of the shaft but now, as seen, at the bottom; as seen, text [4] is below text [2] but, in its original position on the shaft, text [4] was cut above

text [3])

(sic)

2 Τοὺς ἐωνίους
 Αὐγούστους Φλ
 Γρατιανὸν' κὲ Φλ'
 4 Οὐαλεντινιανὸν
 κὲ Φλ' Θεοδόσιον
 6 κὲ Φλ' Ἀρκάδιον
 κὲ Φλ' Ὀνώριον
 8 τοὺς αἰωνίους Αὐγ

line 1: partly buried in the floor and inaccessible for squeezing; it does not appear, therefore, in the drawing (Fig. 6.2.14 [p. 135]) but is partly visible on the photograph (Pl. 7.1.20 [p. 146])

lines 7-8: inscribed over the top of an erasure; they were added to lines 1-6 by a different hand – diamond-shaped *omicron* for O, square *sigma* for C, Φ with angular for circular centre, angular *omega* for lunate ω

line 8: ligature OY in TOYC

Caput Viae
Date

Myra

(1) AD 293, 21.v(?)–305, 01.v Galerius *Caesar*

(2) (?) AD 364, 26.ii–28.iii Valentinianus I *Augustus*

(3) AD 364, 28.iii–367, 24.viii Valentinianus I and Valens *Augusti*,
 then AD 367, 24.viii–375, 17.xi Valentinianus I, Valens and Gratianus
Augusti

(4) AD 383, 19.i–25.viii Gratianus and Valentinianus II and Theodosius I and
 Arcadius *Augusti*, then AD 393, 23.i–395, 17.i Theodosius I and Arcadius
 and Honorius *Augusti*

Commentary (Text 1) Was this text perhaps one of four separate texts, each representing one member of the Tetrarchy?

(Text 2): for Valentinianus I as sole Emperor (named on a milestone), see Kienast (1996, 327), cp. also Petzl and Pleket (1979, 282 no. 1 = RRMAM 2, 1. 694 = RRMAM 3.5. 131).

The stone here was possibly a road terminus-stone (for a definition of the term, see French [1989, 18])

37. Karakise

Province, Sub-province + Admin. Code

Antalya 07-00-0

Map

Elmalı 40-IIc Manastır

Location

“ . . . and now serving as a doorstep in front of the *kahveh* beside the church of the Panagia” (Ormerod and Robinson). Present whereabouts not established (DHF visit 28.x.1994)

Copy

Ormerod, March 1911. Text here of Ormerod and Robinson

45(B). Isparta 2

Province, Sub-Province + Admin. Code and Map As 45(A)

Location In the valley of a stream flowing down to Isparta; at the foot of the mountain, due S of Isparta, on the direct road to Sagalassos (Arundell 1828 and 1834). In Isparta (04.viii.1983) DHF heard unsolicited references to a “round stone” but could acquire no solid information on its (then) whereabouts; it was said that the stone was once located near the bridge on the S edge (now a *mahalle*) of the town, on the old road to Ağlasun. In 1983 no trace of the stone could be found near the bridge.

below line 14: Paribeni and Romanelli read:

ΗΒΟΥΛΗΚΑΙΟΔΗΜΟΣ

////////////////////////////////////

//////////ΟΛΟΥ//////////

line 19: “Between lines 18 and 19” [= here line 19] “there is space for a line of lettering, but nothing is needed and in fact nothing can be read” (Bean and Mitford 1965: 24)

Caput Viae (Syedra)

Date AD 198-209 L. Septimius Severus and M. Aurelius Antoninus (Caracalla) *Augusti*
 with P. Septimius Geta (names erased) *Caesar* and Iulia Domna *Augusta*

Commentary “Published in *IGR* from the Vienna *schedae* after a reading by Wilhelm in 1891, but attributed incorrectly to Hamaxia. Paribeni and Romanelli, deceived by this, republished in 1915, quoting *IGR* III 826 for comparison - without observing that in fact it was the same inscription” (Bean and Mitford 1965, 24 n.40).

“In two respects this text is unusual. On contemporaneous Anatolian milestones Septimius Geta is normally called υἱὸς καὶ ἀδελφὸς τῶν μεγάλων βασιλέων, and we would expect the names of Julia Domna to be in the dative” (Bean and Mitford 1965, 24). The statement is not quite accurate: moreover the evidence has changed. On two milestones only has the name of Septimius Geta survived intact or near-intact (RRMAM 2, 1. 072 = RRMAM 3. 148(A) [Uluköy 1]; RRMAM 4. 05(B) [Yu. İhsaniye 2]) and in one text only (above, 52[B]. Alanya 2) is the full titulature even partly preserved. On all other milestones the name of Septimius Geta and his titles (except for the words τῶν μεγάλων βασιλέων) have been thoroughly erased.

“For the present concentration of epithets and for the replacement of ἀνείκητοι by ἀήττητοι we can find no parallel. Indeed, we do not recall the use of ἀήττητος in an Imperial titulary before the time

of M. Aurelius Antoninus (Caracalla)'s sole reign; while the next belongs to Severus Alexander” (Bean and Mitford 1965, 24 and n.41 quoting IGRR 4. 1251 from Thyatira and IGRR 3. 53 from Prusias [a reference supplied by Dr W. Dressler])

lines 16-22: the Greek version has been reconstructed here on the basis of the Latin text (lines 5-7). The full length of the inscription, as restored here, could perhaps indicate that the text was inscribed not on a short rectangular block but on a tall, narrow and - presumably - cylindrical shaft.

Caput Viae (Attalia)
Date AD 50/51, 25.i-24.i Claudius *Augustus*
Commentary A road terminus-stone ? (French 1989).
 The phrase *vias refecit* is noteworthy – what earlier roads were repaired? The *Via Sebaste* (to Perge) and branch roads (*Via Sebaste* to Attalia)?
