Ian Hodder

## Colour figures for Chapter 30. Building 131

Burcu Tung

*Figure 30.2. West-facing overview of Sp.500 and Sp.556. To the right of B.131 in the photograph is B.1 and to the left, B.132 (photograph by Jason Quinlan).*

Figure 30.3. Orthophoto of B.131 (orthophoto from a model created by Jason Quinlan).

Figure 30.5. North-facing view of the outer face of the southern wall (in the upper part of the photograph) of B.131, F.7705. Notice the circular cut for oven F.4103. The cut was made right above the southern wall of B.139, which is only partially seen. The photograph was taken from Sp.630, so the white plastered wall in the lower part of the image is the northern wall of B.132 which abutted the southern wall of B.139 (photograph by Jason Quinlan).

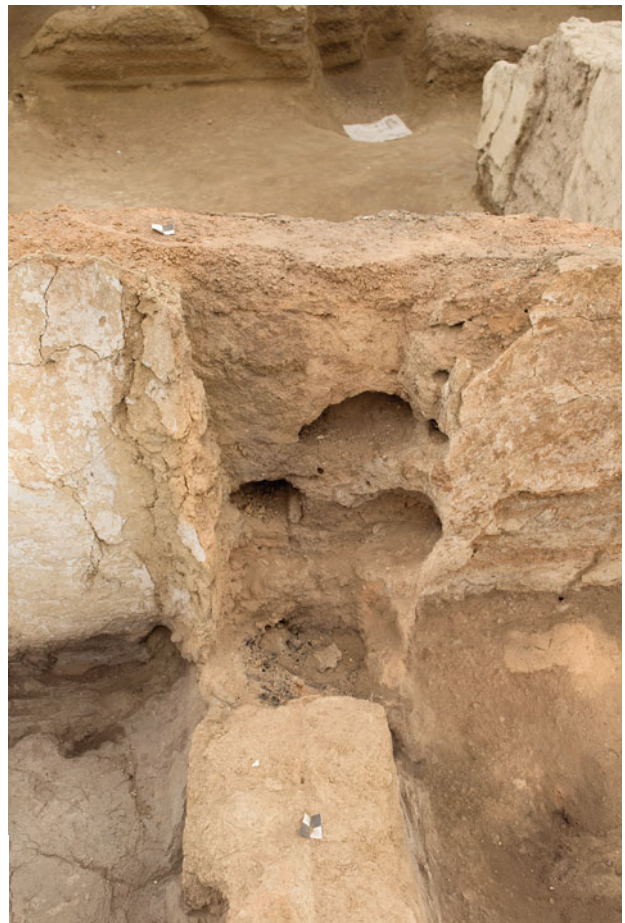

Figure 30.6. North-facing view of engaged post F.7971. Note the poorly preserved timber (photograph by Katie Campbell).

Figure 30.7. West-facing view of timbers (23025) and (23026) within Sp.504 (photograph by Ahmed Kzzo).

Figure 30.8. South-facing view of niche F.4109 (photograph by Jason Quinlan).

Figure 30.10. Northeast-facing view of niche F.7986 during the earliest occupation of B.131. Wall F.7707 had to be excavated, as it was collapsing; therefore, the top break of the cut cannot be seen in this photograph (photograph by Jason Quinlan).

Figure 30.11. 23074.x2 within niche F.7986 (photograph by Ahmed Kzzo).

*Figure 30.12. 23074.x1 within niche F.7986 (photograph by Ahmed Kzzo).*

*Figure 30.13. Pit F.8359, filled with 24 obsidian blades (photograph by Jason Quinlan).*

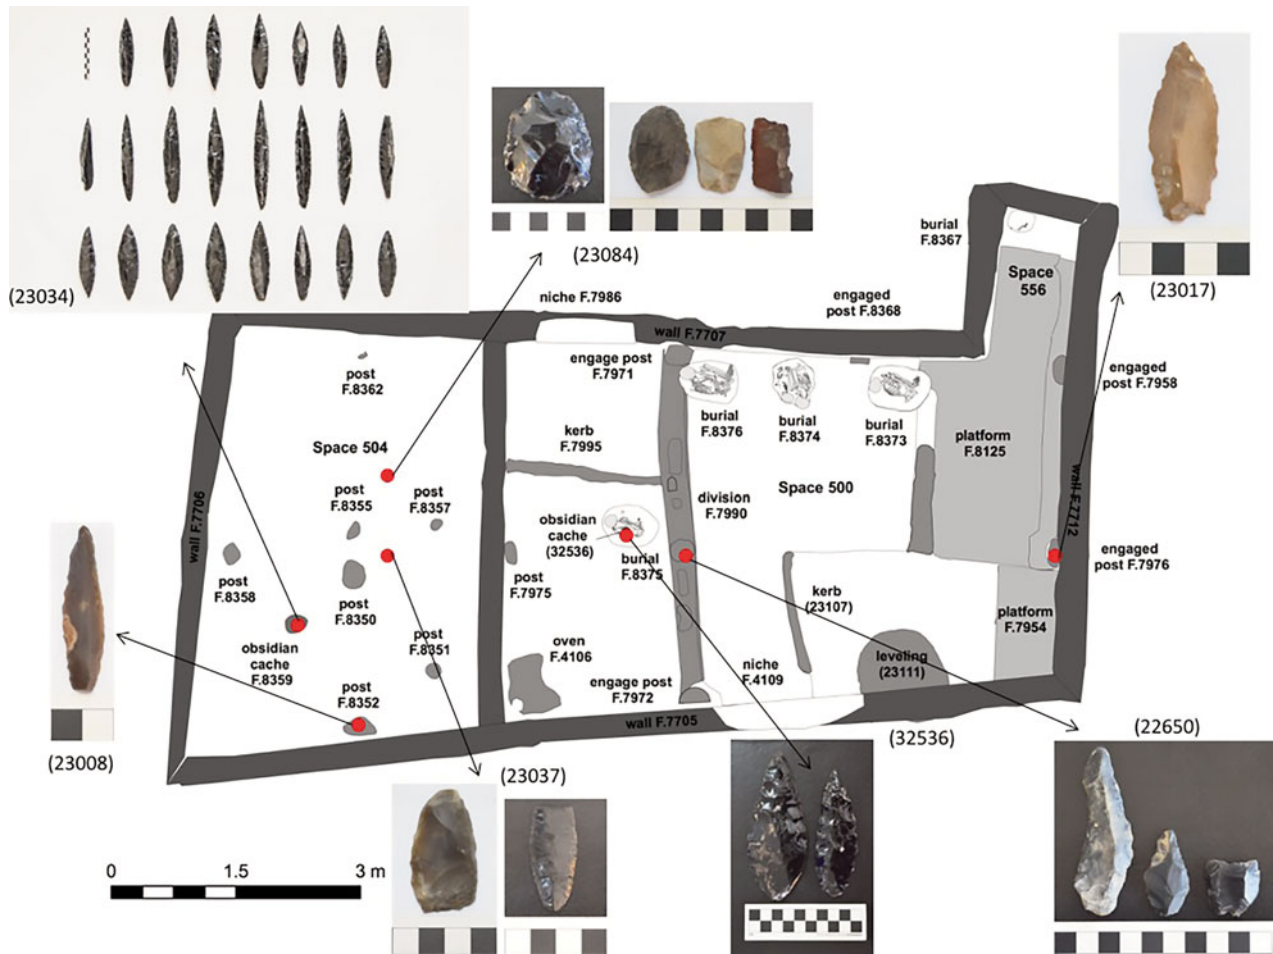

Figure 30.14. The different possible 'foundation' deposits of the chipped stone within B.131 Phase I (source: Sean Doyle).

Figure 30.15. North-facing view of plaster surface (32381) on platform F.7950 and mudbrick construction (32350) of bench/division F.7994 (photograph by Jason Quinlan).

Figure 30.16. South-facing view of floors (32533) covering the southwestern activity area. Note the many truncations that occurred through later activities in the area. Oven F.4106 is faintly visible at the southwestern corner of the area (photograph by Katie Campbell).

Figure 30.17. South-facing view of the southeastern activity area covered with (23024). Notice the shift in the placement of the entry ladder through time. The earlier cut (23012) is the cut to the west, in alignment with the entry step (photograph by Jason Quinlan).

Figure 30.19. North-facing view of niche F.7986, with ground stone blocking its eastern end. Notice posthole F.7991 cutting floor (32371) at the northwestern corner of the activity area (photograph by Katie Campbell).

Figure 30.20. South-facing view of oven F.7953 in the southeastern activity area (photograph by David Fallon).

Figure 30.21. East-facing overview of horizon (30096) across the southeastern activity area, gently lipping up to oven F.7953. To the right of the photograph, immediately west of oven F.7953 is make-up (32366) (photograph by David Fallon).

Figure 30.22. South-facing view of fingerprints, fanned across (32366) (photograph by Jason Quinlan).

Figure 30.23. East-facing view of hearth F.7957 with superstructure (30060) and (30057). Notice the rectangular stake holes (30066) and (30067) on the northeastern corner of the hearth (photograph by David Fallon).

Figure 30.24. North-facing view of skeleton (30044) within burial F.7963. Note to the immediate north skeleton (32330) with its skull painted red. Chert blade 30044.x1 is located by the forearm (photograph by Jason Quinlan).

Figure 30.25. South-facing overview of the top fill of burial F.7963, along with burial F.7977 to its north. Cranium (30043) with the carbonised brain remains is immediately south of the skull of (30044). Notice the criss-crossing of various bones, and the complexity of the secondary skeleton elements (photograph by Jason Quinlan).

Figure 30.26. North-facing view of Sp.504 at the end of the 2014 excavation season. Bin F.7641 dominates the space (photograph by Jason Quinlan).

Figure 30.29. Overview of hearth F.7957, oven F.7953 and platform F.7981 in the southeastern activity area (photograph by David Fallon).

Figure 30.30. Left: rows of black disc beads interspersed with dentalium and other beads, found in situ. Right: some examples of the black disc beads and dentalium beads found within burial F.7961 (photograph by Jason Quinlan).

Figure 30.31. Obsidian mirror 30039.x3, in situ within the fill (30039) of burial F.7961 (photograph by Jason Quinlan).

Figure 30.32. Bench F.7966 with platform F.7965 (photograph by Jason Quinlan).

Figure 30.33. West-facing view of some of the wooden bowls found in situ within burial F.7962 (photograph by Jason Quinlan).

Figure 30.34. West-facing view of burial F.7956, skeleton (22661), with wooden bowl 22641.x1 (photograph by Jason Quinlan).

Figure 30.35. A cluster of ochre stones in the middle of the southwestern activity area (photograph by Thaer Yartah).

Figure 30.36. West-facing view of skeleton (30040) within burial F.7977, located at the right of this photograph. To the very left is burial F.7963, and the painted red skull (32330) of burial F.8708 can also be seen between skeletons (30040) and (30044) (photograph by Jason Quinlan).

Figure 30.37. Examples of preserved textile and cordage within burial F.7977 (photograph by Jason Quinlan).

Figure 30.39. Two figurines found within the fill of B.131 (photograph by Jason Quinlan).
