

Çatalhöyük Excavations: The 2009–2017 Seasons

Edited by
Ian Hodder

Colour figures for Chapter 23. Building 102

Burcu Tung

Figure 23.1. Overview of B.102, facing north, during the 2013 excavations. To the left is side room Sp.18 and to the right, main room Sp.17. The western wall doglegs and abuts the northern end of the eastern wall of B.119. The square pit within Sp.18 is a small test sounding conducted in 2012 (photograph by Jason Quinlan).

Figure 23.3. Overview of B.102, facing south, at the end of the 2014 excavation season (photograph by Jason Quinlan).

Figure 23.5. Engaged pillar F.7115, facing south (photograph by Jason Quinlan).

Figure 23.4. (A) Cut for pot placement F.7131, facing east; (B) plaster lining, (30573), for pot placement F.7131 (photographs by Jędrzej Hordecki).

Figure 23.6. Overview of Sp.18 during B.102.C, facing east. Bin F.3698 abuts the central division. Abutting the bin wall are two large animal bones and quern stone fragment 30161.x1. Towards the right, abutting the southern wall is compound bin F.7116. Floor (30161) contains a relatively large number of stones, bone, a few pieces of pottery and other material culture embedded in its make-up (photograph by Jason Quinlan).

Figure 23.8. The earliest floor (20687) is partially exposed. The oven was excavated in cross-section. Super-structure (20612) contains all the floors of the oven (photograph by Jędrzej Hordecki).

Figure 23.9. Bone ring 21574.x1 (photograph by Jason Quinlan).

Figure 23.10. Cross-sectioned oven F.7101, facing east. The visible fractured floor corresponds to (20637), which was sealed by a fine make-up layer. This layer was then sealed on its southern end by a pisé-like construction (20632), evident at the right end of the photo, abutting the oven's internal wall (photograph by Jędrzej Hordecki).

Figure 23.11. Levelling (30579) and plaster wall (20958) of basin F.3699, facing west. The edge of the levelling where it meets the wall was truncated by animal burrowing. The oval deep cut by the partition wall was the cut for burial F.7134 while the shallow cut at the eastern edge of basin was for pit F.7128 (photograph by Stella Macheridis).

Figure 23.12. Burial F.7134, facing north. Skeleton (20998) was placed in a semi-sitting position within cut (20997) (photograph by Scott Haddow).

Figure 23.13. Bin F.7716 with the addition of make-up (22119) and plaster (20954) to form a lower basin, and make-up (21599) and plaster (21598) to form an upper shelf-like division (photograph by Stella Macheridis).

Figure 23.14. Stone cluster (30580) in Space 18, facing east (photograph by Jason Quinlan)..

Figure 23.15. Bin F.3698 and some of its contents within fill (20294), facing south. The three horn cores are stacked in the photograph (photograph by Stella Macheridis).
